問題Ⅶ

次の文を読んで以下の問に答えなさい。

In today's world, social media is like the air we breathe. It is everywhere, and it's hard to imagine life without it. Social media platforms shape our interactions and influence our daily lives. I would like to discuss the role social media plays in modern society in more *detail.

(A), I think social media is great for keeping in touch. I communicate with my friends on social media every day. We comment on *posts and share *memes. It almost feels like my friends are *close to me, even if they are far away.

(B), I often wonder if we're missing out on real conversations. It's easy to send a quick message, but it's not the same as *hanging out *in person. The ease of online communication can lead to a *decline in face-to-face interaction.

Then there's the pressure to look perfect. Scrolling through *feeds full of amazing photos can be *overwhelming. Everyone seems to be enjoying their lives, and it makes me feel like I need to keep up. I have to remind myself that it's not all real. People usually show the good thing, not the boring days or the tough times.

I also worry about how fast false information spreads. I've seen rumors and fake news get shared, and it's *scary to think how it can affect people's opinions. The *anonymity offered by online platforms may lead to *cyberbullying and misinformation. It's a reminder that we have to be smart about what we believe and share.

Despite these *issues, I believe social media has its benefits. Social media also helps us build new relationships with people who share similar interests. Online communities can help us find *like-minded individuals. Social media provides an opportunity for all people to express themselves and support the causes they care about. It's exciting to know that our voices can be heard.

(C), social media is a mixed bag. It connects us, but it can also *isolate us. It can be a source of stress, but it also gives us a way to make a good impact. I believe that finding a healthy balance is key. We should *prioritize meaningful interactions, self-learning, and *critical thinking when using online content.
